

## I

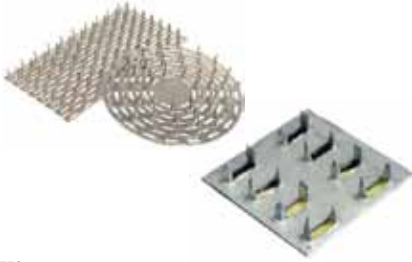

## KNOW HOW

### Tips for restoring your roof

- When repairing a drip, it's essential to do the job right the first time around. If you find one spot on your roof that is leaking, there can be more leaks, so continue to try and find further leaks (if any). Be sure to examine the whole roof structure.
- If you live in hot and dry weather conditions, it is advisable to roof structure your home with a light colour such as light grey or white. Dark colours absorb the sun's rays, which can cause your home to be unpleasantly warm.
- Ensure you have the necessary tools available before attempting to fix your roof. Different roofs will require different tools.

### Safety tips when repairing your roof

- Aim to do any roof repairs on a sunny day when the roof is completely dry. Wet roofs are slippery and can be dangerous.
- Take adequate safety measures and always use safety ropes.
- On steep roofs, be sure to use a ladder framework in order to provide secure anchoring
- Ensure that you wear shoes that will provide good traction when working on your roof, such as rubber-soled shoes.
- Take note of where the power lines are located whilst on your roof and ensure you stay clear of them.

# Celebrating

# years of building innovation.

Saint-Gobain Gyproc is proud to have supplied the South African construction industry for 85 years. With our quality RhinoBoard Plasterboards, RhinoLite plasters and decorative RhinoArt Cornices, we believe every project has what it takes for the perfect finish for years to come.
